PROFESSIONAL PROFILE

I am a Software Engineer, Passionate about UI|UX and Colors.I love technology and all the things we can do with it and most important how we can help people with it.

Currently working on Projects relating to Reactjs and building Interface designs for web and mobile using figma.

CORE SKILLS

- ◆ **Laugueges** - JavaScript , TypeScript
- ◆ **API Testing Tools** - Swagger , Postman
- ◆ **Prototyping Tools** - Figma
- ◆ **Version Control** - Gitlab , Github
- ◆ **CSS Styling** - Styled Component , SaSS ,
- ◆ **Backend** - Nodejs , ExpressJs
- ◆ **State Management**- Context api , Redux, React Query
- ◆ **Frontend Utilities** - Tailwind , Material UI
- ◆ **Graphics Tool** - Photoshop , Illustrator , Coreldraw
- ◆ **Management System** - Wordpress

PROFESSIONAL EXPERIENCES

- ◆ **Ethnos Cyber** - (Frontend Developer) **Febuary 2022 - Present**
 - Build a mobile security platform called **aquila** where developers can upload their apk or ipa files and scan for vulnerabilities in their application
 - Spear Headed is the design of Aquila Mobile security platform using figma
 - Developed a Chat system using technologies like socket.io where users can chat with the custmer representative and lay their complaint.
- ◆ **Castillon Tech** - Graphics | UI Designer | Social Media Manager **2020 - 2021**
 - Design Graphical appealing banners and contents using Photoshop and Illustrator
 - Design web Catchy web Interfeface
 - Create and design content for different Client and managing their Social Media
- ◆ **iDizyn Solution** - Web Design - (wordPress) **2018 - 2019**
 - Develope Astoning web pages using wordpress for different Clients
 - Assist in creating digital artwork (graphics designs) used in developing most of the websites

HIGH LIVE PROJECTS DONE

- ◆ **AQUILA MOBILE SECURITY - AQUILASEC.IO**

AQUILA is a mobile security Platform that aids developers and app owners to scan for Vulnerabilities in their mobile application.

A developer after building his Application can upload either the apk or ipa files , scan for areas where security measures are not properly ensured.

I developed this platform using reactjs for the frontend , redux for the state management and socket.io for the chat system.

- ◆ **PIXO.NG - PIXO.NG**

Pixo is a web application designed majorly for photographers in mind.

After taking and enhancing pictures for their client , Pictures can be uploaded to Pixo.ng where their client can download them without the image quality being altered.

I assisted in developing it using reactjs , redux.

PERSONAL PROJECTS DONE

- ◆ **MOVIE APP - <https://viv-react-movie-app.netlify.app/>**

A personal project i did using reactjs where I consume movie api from rapidApi and display it in a aesthetic manner, functionality also includes sorting and search.

- ◆ **COCKTAIL REACT PROJECT - <https://viv-cocktail.netlify.app/>**

This project was done with reactjs , consumed api from cocktailDB. Each cocktail drink can be viewed on a different page and sorting functionality was implemented.

- ◆ **GTP-3 UI - <https://viv-modern-ui.netlify.app/>**

A static website I built utilizing Color gradient and was built using reactjs.

EDUCATION

- ◆ **Institut Superieur Saint Paul de Tarse (ISSPT University)**

Bsc - Computer Science

2021 - 2023

- ◆ **OneCampus**

Diploma - Machine learning

2021 - 2022

- ◆ **APTECH Computer School**

Advanced Diploma - Software Engineering

2019 - 2022

- ◆ **St. Michaels Comprehensive Sec. School**

Senior secondary School

2007 - 2013
